

# Community Garden Bed Replacement Fundraiser

Strong Family Farm

Strong Family Farm is the last historical farm in Vernon, CT, and one of our most popular community opportunities is our Raised Bed Garden program. Our old wood elevated beds built 6 years ago have served our community gardeners well, but exposure to the weather has caused the wood to decay. With your support we can replace the damaged beds and add more to clear our gardener waitlist!

## Our Fundraising Goal

We are replacing our old beds with with metal tub-style beds that will last longer, accommodate deeper roots, and require less watering. Funding our campaign will provide:

- Ten 32-inch-high garden bed kits
- Organic garden soil for the deeper beds
- Compost to mix in the beds
- Cover the program fees for the 2025 season

*Sustainable CT has also generously agreed to match every dollar donated up to \$4,205!*
